Description

The input tool allows you to directly connect Digimatic measuring devices to a USB interface, without needing additional software.

The USB Input Tool Direct offers the following benefits:

- Measurement data is converted into keyboard codes, enabling interaction with any program working with keyboard entries. (HID)
- You can also connect to a USB with fixed COM assignment in Microsoft Windows as a channel identification (VCP) with USB IT PAK software only.
- The USB-IT PAK software lets you easily create Microsoft Excel worksheets.

Specification

Data input:	1x Digimatic/Digimatic 2
Data output:	USB Virtual COM-Port (VCP) with USB IT PAK, USB keyboard signal (HID)
Output decimal mark:	Emulates the local setting
