

AFH FAST

Highspeed – Data transfer software for force measurements

SAUTER AFH FAST

software für time critical force measurements

Quite some force measurements are performed in very short time-frame – sometimes only a few seconds.

This high speed data transfer to a PC can be realised up to 10 data sets per second, combining AFH FAST with SAUTER FH or SAUTER FT (only 3 data sets per sec.)

AFH FAST shows the results in a Force-Time-Graph and can export the data to MS Excel.

Fastest data transfer rate AFH FAST to PC (in data sets / sec)

10 Hz (with FH)
3 Hz (with FT)

Output format

.csv (MS Excel)

Connectable cables (RS 232 cable is included)

RS 232 / USB (opt.)

AFH FAST (software with cable)

Option: RS 232 to USB (converter unit)

SAUTER AFH 12
